

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site Name:	Engineering Research, Inc.
Applicant's Name:	The Babcock & Wilcox Company
Site Location:	10930 East 59 th Street Indianapolis Marion County
VRP Site Number:	6961011
Project Manager:	Damon Ridley
Date Application Received:	October, 1996
Date Project Completed:	February, 1999
Project Duration:	2 years, 4 months
Contaminant Group(s):	Metals, Volatile Organic Compounds (VOCs)
Media Cleaned Up:	Subsurface Soil
Cleanup Goals Achieved:	Tier II Nonresidential
Deed/Land Use Restrictions:	Nonresidential

Project Description: The site was a manufacturing facility which performed abrasive blasting, plating, and painting.

A property transaction in August of 1997 called for a site Phase I Investigation to be performed. This investigation identified two areas within the facility as having 1,1,1-trichloroethene (TCE) soil contamination above VRP Tier II Nonresidential levels.

The manufacturing equipment and machinery were removed from the site when the property was sold. The two areas of concern were excavated and the soils were treated on-site with a thermal treatment system. Confirmation sampling demonstrated that VRP Tier II Nonresidential standards were met.
